Skerries '29' fishing boat

–the tough Orkney breed

29/SK/78

Length o.a.	29 ft. 9 in. (8.76 m) moulded
Beam	12 ft. 0 in. (3.65 m) moulded
Draught	4 ft. 0 in. (1.22 m)
Displacement	7½ tons
Speed	7½ - 8½ knots

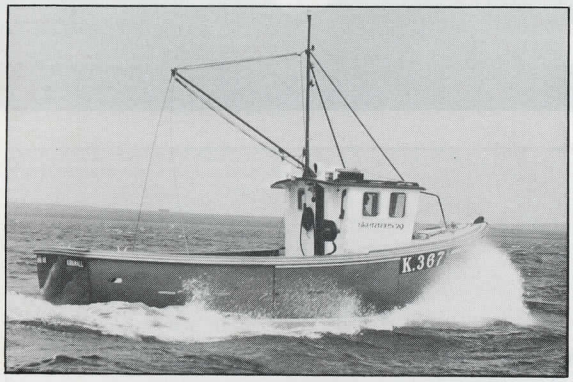

The Skerries 29 is a rugged, purpose-built, top quality boat intended for the discerning man who fishes for a living. The full-displacement, exceptionally beamy hull, with lines developed from those of a traditional North-Scottish design, provides seakeeping and seakindliness of the highest order. It's a fishing boat that works — and goes on working.

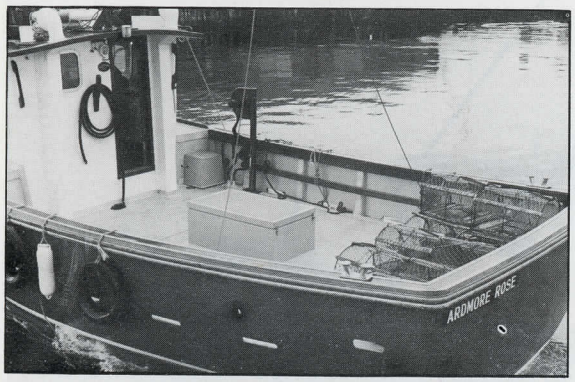

Maximum use of Lloyd's-approved G.R.P. mouldings — hull, decks, wheelhouse and many internal units — brings minimum maintenance and more profitable operation.

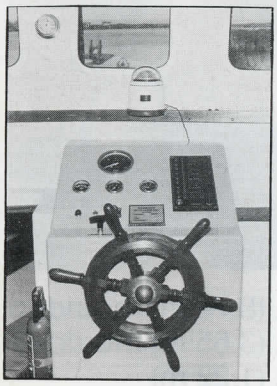

The large self-draining working deck — apart from the hatch to the underfloor hold — is entirely free of obstruction, and can be equipped for potting (standard hauler supplied), or for trawling, lining, dredging, tramelling, etc. If your sort of fishing demands a boat of top quality, high integrity and safe, economic operation based on experience — **find out more about the Skerries 29.**

Standard specification overleaf:—

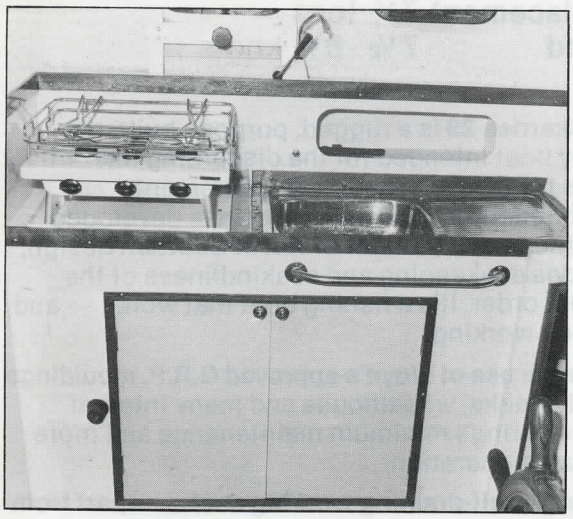

Skerries '29' — the tough Orkney breed

Pictures show the purposeful lines of *Ardmore Rose* at sea, the ample self-draining working deck, the G.R.P.-moulded console and the galley unit in the wheel-house.

Standard specification

29 ft. HEAVY DUTY GLASS FIBRE FISHING BOAT

Hull	The hull, deck, wheelhouse, fuel tanks, moulded in G.R.P. under Lloyd's supervision. Extensive use of G.R.P. includes wheelhouse lining module and instrument console, hatches, steps, ventilator trunking, etc.
Engine	Perkins 4/236 m rated at 54 bhp @ 1,800 rpm with 3:1 reduction.
Stern Gear	Heavy duty type, with stainless steel tail shaft, bronze tube and three-bladed propeller.
Steering	Hand hydraulic type; balanced rudder and heavy skeg.
Electrics	24-volt installation for engine starting and boat's lighting to WFA requirements.
Fendering	Heavy duty timber gunwales fitted at sheer level with galvanised cope iron sheathing. Expendable G.R.P. panel in way of hauler.
Line Hauler	Spencer Carter capstan/hauler type, 600 lb pull, fitted starboard side.
Bilge Pumping	Two suction system with engine-driven and hand pumps.
Deck Fittings	Standard set including alloy fore-hatch, bollards, fairleads, mast and landing derrick, safety rail.
Life Saving	Equipment as per UK statutory requirements.
Out Fit	To standard schedule.
Accommodation	For two persons with bunks, lockers, etc., in foc's'le, two-burner gas cooker and stainless steel sink in galley.
Delivery	In the water, Kirkwall.

Approvals. Hull mouldings, from our temperature-controlled factory at Kirkwall, are approved by the relevant authorities in UK, Ireland, Iceland, France, Denmark, Faeroes, Canada and Norway.

The price, given in our separate price list, is for the standard boat to the specification given above. Variations of engine, steering and deck machinery can be incorporated at extra cost. Electronic nav-aids and fish finding equipment can be fitted as required, but are not included in the standard specification.

All-round capability

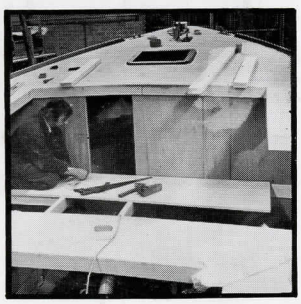

DESIGN

From design proposals based on our existing models to initial project appraisals we offer a comprehensive design service. We will also work with your own consultant on new projects.

G.R.P. MOULDING

We offer a fully Lloyd's approved moulding service in a temperature controlled 18,000 sq. ft. factory, where all work is undertaken under the supervision of Lloyd's Register of Shipping. In addition to our workboat and fishing boat range we also offer a series of modular and one-piece water storage tanks.

FITTING OUT

A full range of out-fitting skills is available including marine engineering, electrical and carpentry trades. In addition to our range of standard workboats we are also able to offer special custom built models to meet special requirements.
