SKERRIES fishing boats — developed and proven on one of the world's toughest stretches of water — the Pentland Firth, are designed and built of highest quality materials and to a high standard of workmanship.

The hull designs are based on those of traditional fishing craft operating in an area which is renowned for its strong currents, rocky shores and sudden winter gales. Earlier versions have survived groundings, collisions and the continual rough treatment associated with fishing for a living.

Maximum use of GRP (glass reinforced polyester) ensures minimum maintenance and the greatest possible number of days for fishing. Simplicity and good sense in design and layout make the Skerries range of fishing boats suitable for most of the world's fishing applications.

SKERRIES — the experience-proven fishing boats.

Front cover pictures: 29 ft. Skerries fishing boat *Ardmore Rose*, West of Scotland.

Standard boats available

- **Skerries '24'** — 24 ft. (7.3 m)
- **Skerries '29'** — 29 ft. (8.8 m)
- **Skerries '36'** — 36 ft. (11.0 m)

Heavy duty fishing boats for potting, trawling, line-fishing, dredging, tramelling, etc.

- **Skerries '50/54'** — 50 or 54 ft. (15.2 or 16.4 m)

(From an adaptable 50 or 54 ft. mould)

ALSO — the Amazon range of heavy-duty workboats with hull dimensions the same as those for Skerries fishing boats. Amazon workboats are suitable for use on pilot/harbour launch duties, as harbour tugs, personnel boats, offshore industry support boats, etc. Ask for the Amazon brochures.

Skerries 36 *Anny*, Skagaströnd, Northern Iceland.

Skerries 36 *Drumbeat*, Wick, North of Scotland.
